

ShopSphere Payment Policy

Effective Date: January 1, 2026

Last Updated: January 1, 2026

1. Purpose

This Payment Policy explains the payment methods accepted by ShopSphere, payment authorization, billing practices, refunds for failed transactions, and customer responsibilities when making purchases.

2. Accepted Payment Methods

ShopSphere accepts UPI, credit cards, debit cards, net banking, supported digital wallets, EMI on eligible products, and Cash on Delivery where available.

3. Payment Authorization

Orders are processed only after successful payment authorization, except for eligible Cash on Delivery orders. ShopSphere may perform verification checks to prevent fraudulent transactions.

4. Pricing and Taxes

All prices displayed include applicable taxes unless stated otherwise. Shipping charges, discounts, and promotional offers are calculated during checkout.

5. Payment Failures

If a payment fails but the amount is debited, the payment provider or bank generally reverses the transaction automatically. Customers should wait for the applicable banking timeline before contacting support.

6. Duplicate Payments

If duplicate payments are received for the same order, the excess amount will be refunded after verification using the original payment method wherever possible.

7. Cash on Delivery

Cash on Delivery is available only for eligible products, locations, and order values. ShopSphere may restrict COD based on customer history or operational requirements.

8. Security

Online payments are processed through secure, encrypted payment gateways. ShopSphere does not store complete card details on its own servers.

9. Fraud Prevention

ShopSphere reserves the right to cancel or hold orders if suspicious payment activity, identity verification issues, or policy violations are detected.

10. Contact

Customers experiencing payment-related issues may contact ShopSphere Customer Support through the Help Center. ShopSphere may update this policy from time to time.
